

NATIONAL
BANK of
COMMERCE

is pleased to offer

Remote Deposit

for our business clients!

What is Remote Deposit?

Remote Deposit is an exciting product that enables you to make deposits into your bank account electronically—without ever leaving your place of business! All you need is an internet-enabled PC with a browser and the check scanner we provide.

How does Remote Deposit work?

You accept check payments from your customers. Then, using Remote Deposit, you scan and submit those checks securely over the internet to us. We pick up your remote deposits and process the checks accordingly. It's just that simple!

How do I know this is safe?

Depositing your checks remotely is largely made possible by "Check 21" legislation. Check 21 makes a "substitute check" the legal equivalent of the original check. So, Check 21 gives us the opportunity to replace labor-intensive, paper-based check processes with quicker, safer, image-based handling and clearing services. The result is faster deposits, more efficient collections, and tremendous convenience for you and your business!

Save time by
eliminating trips
to the bank
—now you can
make deposits
from your own
computer!

Why Remote Deposit?

- > **Convenience** – eliminate daily trips to the bank by depositing checks right from your desktop!
- > **Flexibility** – make deposits any time you want, day or night!
- > **Savings** – save time and money by reducing trips to the bank and avoiding NSF fees.
- > **Cash Flow** – clear checks faster and speed up your availability of funds.
- > **Peace of mind** – reduce your risk of fraud and assure that your deposits are being made daily.
